# Chapter 1

## Introduction

Pharmacy Duty Roster (PDR) is a web application that allows to operate a duty roster for pharmacies. PDR started in 2015 as an alternative to a really simple excel sheet without formulas. PDR aims to be user-friendly but at the same time cover all necessary features. PDR continuously strives to improve. It is open to your requests and wishes. I hope it will fulfil your expectations.

### 1.1 Getting PDR

The latest release of PDR is available on [GitHub](#). GitHub provides the source code as \*.zip file or \*.tar.gz ball. Extract the files into a folder.

Make sure to unpack PDR to a directory, that your webserver has access to. PHP and the webserver must have read access to all the files and folders. It also needs write access to the subdirectories upload, tmp and config. You might want to change the owner of the directory to the webserver's user with e.g.:

You can also clone the repository with git:

```
git clone https://github.com/MaMaKow/dienstplan-apotheke.git
```

See the Administrator manual for details!

### 1.2 License

PDR is open source software under the AGPL license.

Copyright (C) 2018 Dr. Martin Mandelkow

This program is free software: you can redistribute it and/or modify it under the terms of the GNU Affero General Public License as published by the Free Software Foundation, either version 3 of the License, or (at your option) any later version.

This program is distributed in the hope that it will be useful, but WITHOUT ANY WARRANTY; without even the implied warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the GNU Affero General Public License for more details.

You should have received a copy of the GNU Affero General Public License along with this program. If not, see <https://www.gnu.org/licenses/>.

Please see the [license file](#) for details!

## 1.3 Reporting bugs

The issue tracker is currently located at GitHub. GitHub requires an account in order to report bugs or feature requests. If you do not want to create one, you might send a mail to [pdr-issues@martin-mandelkow.de](mailto:pdr-issues@martin-mandelkow.de)

## 1.4 How to contribute

Pull requests are desired. If you made changes to PDR and want to contribute them to the public, you are welcome to open a pull-request on GitHub or send your changes in any other way.

# Chapter 2

## User manual

### 2.1 The web interface

You can connect to your PDR instance using any web browser. Just navigate to your server and enter your username and password.

#### 2.1.1 Login

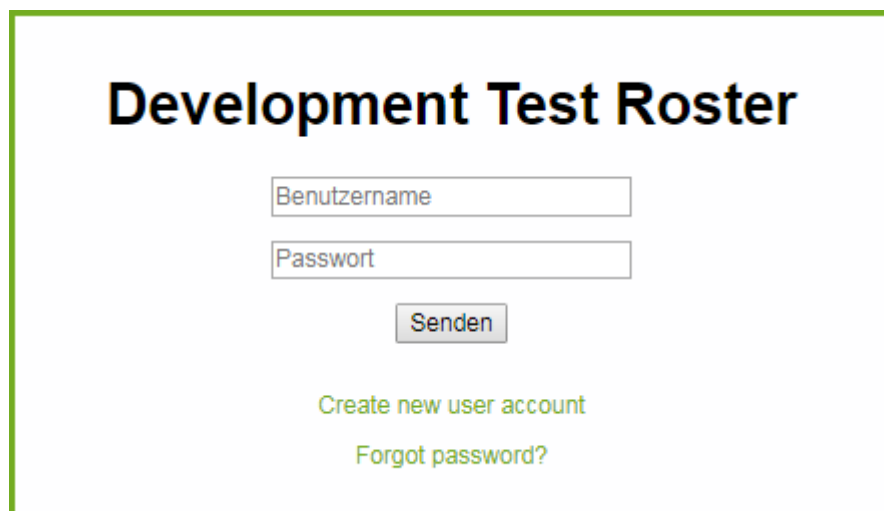

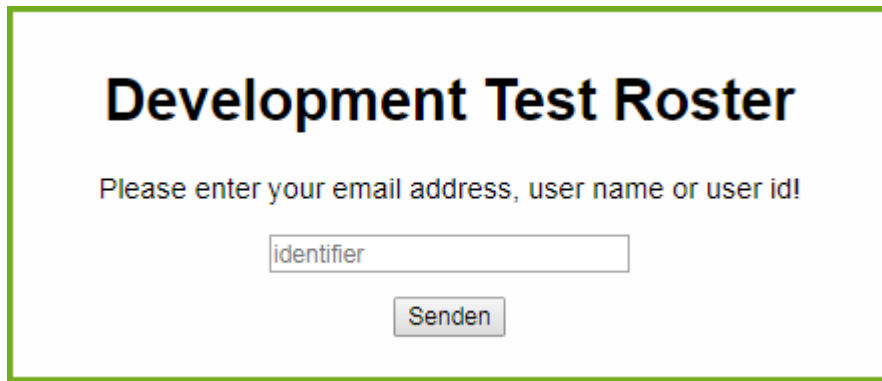

The image shows a web interface for 'Development Test Roster'. At the top, the title 'Development Test Roster' is displayed in a large, bold, black font. Below the title, there are two input fields: the first is labeled 'Benutzername' and the second is labeled 'Passwort'. Both fields are rectangular with a thin border. Below these fields is a button labeled 'Senden'. At the bottom of the form, there are two links: 'Create new user account' and 'Forgot password?', both in a green font.

Figure 2.1: Login page

The login page shows the name of the application. You are prompted to enter your username and password. If you do not have an account yet, you can create one. Just follow the link. If you have an account, but forgot about your password, or want to change it, you can click on "Lost password?".

#### 2.1.2 Lost password

The lost password page shows the name of the application. You are prompted to enter either your username, id or your email-address at your option. After you submit the form, an email is sent to your stored email address. In that email you will find a link. That link will lead you to the password change page.

**Development Test Roster**

Please enter your email address, user name or user id!

Figure 2.2: Lost password page

### Lost password recovery

The lost password recovery page shows the name of the application and your user name. You are prompted to enter a new password twice.

#### 2.1.3 Create new user account

New users can only be created for existing employees. New employees are created by an administrator. Choose a user name, enter your employee id and your email. And enter a password twice.

The account will be inactive until an administrator activates it. The administrator is informed via email regarding the registration.

#### 2.1.4 Navigation

By default, the PDR web interface opens to your a menu containing 5 tiles. You can navigate to:

- Roster week table view
- Roster daily view
- Roster employee view
- Overtime
- Absence

### The navigation bar

In the top there is a navigation bar containing hyperlinks to nearly all the pages of PDR. Hover the mouse over an entry to open the submenus.

Figure 2.6: Roster week table view, excerpt without task rotation and weekly working hours

## Roster week table view

## Roster daily view

## Roster employee view

## Overtime

## Absence

There are four views to the absence data.

- Employee view readonly
- Employee view edit
- Monthly table
- Year overview

In the *Employee view readonly* there is a select element to choose the employee to view. There is a button to switch to the edit view. And there is a table containing the absence data. The columns are start and end of the absence, reason of absence and number of days. There is a distinct list of possible reasons ( vacation, remaining holiday, sickness, sickness of child, unpaid leave of absence, paid leave of absence, parental leave and maternity leave). The number of days of absence is calculated for a 5 day week. Absences on Saturdays and Sundays are registered but not counted. The same applies for holidays.

# Chapter 4

## Developer manual

### 4.1 Core development

### 4.2 Documentation

This documentation about a programm, app or script is a stub. You can help this project by expanding it.

### 4.3 Testing

### 4.4 Bug tracker

### 4.5 Translation

#### 4.5.1 Internationalization

Different countries have different laws regarding pharmacies and employment. They also have different holidays.
